Promsvyazbank Mission

The mission of Promsvyazbank is to promote the resurgence and prosperity of the great Russia, the strengthening of its economic power and defense capacity through stimulating the growth of nationally oriented enterprises, active participation in the development of finance industry, honorable representation of our country on international capital markets and providing the clients with best opportunities for realization of their economic potential.

Promsvyazbank Values

Openness and Transparency

We adhere to the principles of honest business and comply with ethical norms and rules of business conduct as the basis of relations with clients, partners and the society in general.

Independence and Harmony

Drawing a clear line between business and intensive political activity, we consciously stand apart from participation in any form of political struggle and defend the material interests of the Bank in harmony with the interests of the society.

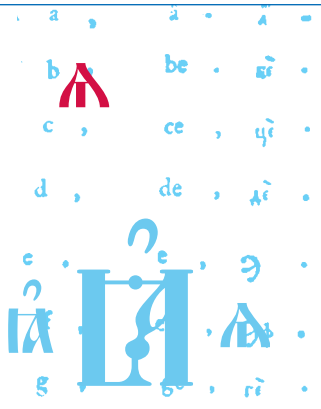
Scope and Traditions

Preserving the traditions is the keystone of our success in the future. We are steadily moving forward using our experience accumulated over many years for the expansion of business in Russia and on international markets.

Continuous Improvement and Efficiency

Continuous improvement of business solutions and processes and the enhancement of staff work's efficiency contribute to our competitiveness. Realizing the need for further development, we encourage innovations and creative approach. We try to seek optimal solutions for any tasks, regardless of scope and complexity.

Team Spirit and Unity

We are a single team united by a common goal. We support and respect each other. We share common values, thus reaching unity and mutual understanding at work. We pool individual efforts in to the Team energy to the benefit of our clients, partners and the society in general.


Numerous researchers of Slavonic culture have not arrived to an agreement about the fate and design of the letters that were lost. For instance, it's the enigma of what is known as "yus" and letters identical to Greek letters. Some experts say these letters disappeared from the alphabet as they were characterized by "disharmonious sound" and were too complicated to write.
